TWINKLE
What is Twinkle?

A digital integration tool to process supply chain data between two different systems, fast and easy.

Twinkle recognises and memorises data patterns to convert one data format to another.
TWINKLE

What does Twinkle offer?

✓ Digitalising part of the supply chain

✓ Safety and proven accuracy

✓ An easy-to-use platform for everyone

✓ Instantly integrating a new customer into the system

We reduce approx. 80% of integration time that involves manual entering of data.
